

Manager, Facilities and Logistics

OUR COMPANY:

Denison Mines Corp. ("Denison") is a public company listed on the NYSE American and TSX stock exchanges focused on the advancement of a portfolio of uranium exploration and development project interests in the Athabasca Basin region of northern Saskatchewan. Denison is also responsible for mine care and maintenance of its decommissioned mine sites in Elliot Lake, Ontario.

Denison's flagship project is the Wheeler River Uranium Project (the "Project"), which is the largest undeveloped uranium mining project in the infrastructure-rich eastern portion of the Athabasca Basin region in northern Saskatchewan. The Project is located approximately 35 km north-northeast of Cameco's Key Lake Operation and 35 km southwest of Cameco's McArthur River Operation in the eastern portion of the Athabasca Basin. The Project is accessible by vehicle and is located about 5 km west of Highway 914.

In August 2023, Denison filed (i) the Feasibility Study ("Phoenix FS") completed for In-Situ Recovery ("ISR") mining of the high-grade Phoenix uranium deposit ("Phoenix") and (ii) a cost update to the 2018 Pre-Feasibility Study for conventional underground mining of the basement-hosted Gryphon uranium deposit ("Gryphon"). With the successful completion of the Phoenix FS, Denison has advanced the planned Phoenix ISR project through the technical de-risking process and has already commenced the first phases of project execution. Concurrently, Denison is also advancing the environmental assessment ("EA") process, which is a critical step to securing the approvals necessary to develop and operate a mine in Canada.

The planned Phoenix ISR operation is on track to become the first ISR uranium mining operation in Canada, and has the potential to be one of the lowest-cost and most environmentally sustainable uranium mining operations in the world.

Denison is building the Wheeler Project development team and is looking to attract top candidates who want to be a part of our ambitious development story.

THE ROLE:

The **Manager, Facilities & Logistics** will work closely with the operations team and plays a pivotal role in ensuring the smooth and efficient functioning of facilities as well as people and material movement. Responsible for overseeing day-to-day operations of facilities, managing vendor relationships, and implementing safety protocols, this role is central to maintaining a secure and compliant working environment. The manager will also extend their expertise to support the Wheeler River site, handling logistics in the movement of both people and materials to and from the project, collaborating with on-site teams, and spearheading improvement projects. This position will report to the Vice President Operations.

This role is being offered as a full-time position. All applicants must be eligible to work in Canada. Denison offers a competitive compensation and Benefits Package, including Health and Dental coverage, Life insurance, Employee Assistance program, Bonus program and a Retirement Savings plan.

This role will be based in Saskatoon, Saskatchewan. The role may require travel to project sites located in the Athabasca Basin. The successful candidate will be required to follow Denison's health and safety policies and procedures.

Denison is committed to providing employment opportunities for Indigenous people and members of the communities near where we operate and encourage applicants who are Indigenous and / or residents of those communities to apply and to voluntarily self-identify the appropriate information in their application details.

Manager Facilities & Logistics

OUR IDEAL CANDIDATE:

You have a background in facilities management, a track record in overseeing building or camp operations, and excel in organization, and problem-solving. You have strong communication, along with experience in coordinating facilities at remote sites like Wheeler River. You understand safety regulations, possess budget management skills, and are proficient in facility management software. You are someone who can efficiently navigate the dynamic challenges of facility coordination, ensuring a secure, compliant, and optimized working environment.

Qualifications:

- Bachelor's degree in facilities management, business administration, or a related field.
- A minimum of 5-7 years of relevant work experience.
- Proven experience in facilities and/or logistics coordination or a similar role.
- Strong organizational and multitasking abilities.
- Excellent communication and interpersonal skills.
- Proficiency with Microsoft Word and Excel is mandatory.
- Knowledge of local regulations and safety standards.
- Proficiency in using facility management software and tools.
- Experience with SAP or other similar software would be considered an asset.
- Problem-solving skills to address unexpected facility issues.
- Ability to work collaboratively with cross-functional teams.
- Attention to detail and a proactive approach to facility management.
- Certification in facilities management or related field is a plus.

YOUR RESPONSIBILITIES:

- Oversee daily operations of all facilities, including office building, warehouse and camp facilities, ensuring a safe and efficient working environment.
- Coordinate maintenance and repairs for equipment, systems, and the physical workspaces.
- Manage relationships with vendors and service providers to ensure timely and cost-effective facility services.
- Develop and implement facility policies and procedures to maintain compliance with building regulations and safety standards.
- Assist in space planning and allocation to optimize the use of office resources.
- Monitor and manage facility budgets, identifying cost-saving opportunities.
- Respond to facility-related emergencies and implement contingency plans as needed.
- Collaborate with various teams to support office moves, expansions, or renovations.
- Conduct regular inspections to identify and address potential safety hazards.
- Maintain accurate records of facility-related activities and expenditures.
- Coordinate and support facility-related activities at the Wheeler River site, ensuring alignment with organizational standards.
- Collaborate with on-site teams to address facility issues and optimize day-to-day operations.
- Manage transportation logistics for personnel and materials between the main office and the Wheeler River site.
- Ensure that the Wheeler River site complies with industry regulations, environmental standards, and safety protocols.
- Engage in the development of future logistics planning including flight schedule coordination.
- Participate in design planning for future project camp and airport facilities.

Manager Facilities & Logistics

- Act as the main point of contact for external agencies, contractors, and stakeholders related to the Wheeler River site.
- Plan and execute facility improvement projects at the Wheeler River location.
- Supervise administrative support, and warehouse and camp personnel.

Interested applicants should submit their resume with cover letter to jobs.sk@denisonmines.com. All applicants must be eligible to work in Canada. Please include the job title for which you are applying in the subject line of your email application. We thank all applicants for their interest; however, only those candidates selected for interviews will be contacted.
